

USER DOCUMENTATION

GROUP N: FEMI, DAVID, ERIC, KENNETH, EVAN

1. INTRODUCTION

The goal of this project is to replicate a paper document used to apply for Teaching Assistant positions in an electronic format. Using this product, a student can apply for positions (TA if graduate student, PLA if undergraduate) in a specific class of their choosing in the Computer Science Department. The application will be accessible online through a browser, and will, at least partly, automate the process of sorting through applicants for the instructor.

2. USERS

2.1. Applicants.

- Must be able to log in and out of account
- Applicants must be able to apply to become a TA/PLA
- Applicants may override a current submission
- Able to view personal submission
- Able to view status of submission
- Must be able to attach resume

2.2. Instructors.

- Must be able to log in and out of account
- Must be able to view and compare applicants
- May select and add applicants to a 'shopping cart' per course during the given time frame
- Must be able to add a TA/PLA to their class
- May create comments on applicants
- Must be able to view resumes from applicants

3. SYSTEM REQUIREMENTS

3.1. Client.

- Mozilla Firefox or Google Chrome web browser
- Internet connection

3.2. Server.

- RedHat Linux 7.x
- Apache 2.x
- MySQL 5.x
- PHP 5.x
- Internet connection
