USER DOCUMENTATION

GROUP N: FEMI, DAVID, ERIC, KENNETH, EVAN

1. INTRODUCTION

The goal of this project is to replicate a paper document used to apply for Teaching Assistant positions in an electronic format. Using this product, a student can apply for positions (TA if graduate student, PLA if undergraduate) in a specific class of their choosing in the Computer Science Department. The application will be accessible online through a browser, and will, at least partly, automate the process of sorting through applicants for the instructor.

2. USERS

2.1. All Users.
- Sign into an account
- Sign out of an account

2.2. Applicants.
- Apply to become a TA/PLA
- Override a current submission?
- View personal submission and status of submission?

2.3. Professors.
- View accepted and relevant applicants
- View/Download? resumes from applicants?
- Select and add applicants to a shopping cart
- Create public/private comments on applicants
- View course

2.4. Graduate Program Director?
- View all applicants
- Accept or deny applicants

2.5. Administrators.
- View all accepted/unaccepted applicants
- Assign a TA/PLA to a class
- Set temporal windows
- ADMIN THINGS?
