USER DOCUMENTATION

GROUP N: FEMI, DAVID, ERIC, KENNETH, EVAN

1. Introduction

The goal of this project is to replicate a paper document used to apply for Teaching Assistant positions in an electronic format. Using this product, a student can apply for positions (TA if graduate student, PLA if undergraduate) in a specific class of their choosing in the Computer Science Department. The application will be accessible online through a browser, and will, at least partly, automate the process of sorting through applicants for the instructor.

2. Users

2.1. **Applicants.**

2.2. **Instructors.**

3. System Requirements

3.1. **Client.**
- Mozilla Firefox or Google Chrome web browser
- Internet connection

3.2. **Server.**
- RedHat Linux 7.x
- Apache 2.x
- MySQL 5.x
- PHP 5.x
- Internet connection
